

EMC3 Consults nationally and internationally & provides course-on-demand.	
Examples:	
Corrosion & corrosion control	Principles of corrosion risk & mitigation
Advanced coatings (smart, self-healing, nano-coatings)	Materials/surface characterization techniques
Materials/coatings failure analysis	Welding inspection & Failure analysis
Coatings and materials testing and evaluation	Verification of materials with international standards
Tailored corrosion/coatings training courses	Stress corrosion cracking and microbiological corrosion
Materials/coatings selection & metallurgical investigation	Failure analysis / Fatigue/ Fracture toughness
Surface pre-treatment and modification	Cathodic protection
